

DILSHAD YOUSUFF

Bangalore, India | yousuffd@gmail.com | +91 9845976468 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business Intelligence Manager with 20+ years building analytics solutions for Google Cloud, Mandiant, and McAfee. Specialize in revenue analytics (ARR, churn, retention), product analytics (adoption, funnel, cohort), and self-service BI platforms. Built Looker dashboards serving 1,000+ users, optimized BigQuery performance by 40%, and reduced dashboard refresh times by 60%. Expert in Power BI, Looker, BigQuery, Python, and SQL for solving complex business problems.

CORE COMPETENCIES

Revenue Analytics (ARR/MRR/NRR/Churn) • Product Analytics (Adoption/Funnel/Cohort) • Power BI & Looker • BigQuery & SQL • Python & DAX • Power BI, Tableau & Looker • Data Warehousing • Self-Service BI • Executive Dashboards • Cross-Functional Leadership Power BI & Looker

PROFESSIONAL EXPERIENCE

Manager, Finance Business Intelligence | Google Cloud | Nov 2022 – Dec 2025

- Integrated Mandiant financial data into Google Cloud post-acquisition by migrating 5+ years of historical data across systems (Salesforce, Azure), ensuring 100% data accuracy validated through reconciliation processes.
- Built automated Looker dashboards tracking product adoption, customer retention, and revenue KPIs by designing 40+ reusable LookML models, reducing manual reporting time from 20 hours/week to 2 hours and enabling self-service for 1,000+ users
- Created Revenue Walk analytics framework measuring ARR progression, churn impact, and expansion revenue by developing SQL models analyzing 50K+ customer accounts monthly, directly informing quarterly executive reviews
- Improved BigQuery query performance by 40% by implementing partitioning on high-traffic tables, optimizing 200+ queries, and reducing monthly compute costs.
- Developed product analytics tracking feature adoption and user engagement across 8 SaaS products by building cohort analysis models and funnel visualizations, identifying 3 underperforming features that drove product roadmap changes

Manager, Strategy & Analytics | Mandiant (Now part of Google Cloud) | Dec 2014 – Oct 2022

- Reduced dashboard refresh time by 60% (from 4 hours to 90 minutes) by building optimized ETL pipelines processing 2M+ records daily and consolidating 12 data sources into centralized data marts
- Built Power BI dashboards tracking customer lifecycle metrics (acquisition, retention, expansion) by creating 50+ DAX measures and connecting multiple data sources, providing sales and product teams real-time visibility into \$200M+ ARR
- Developed churn prediction model identifying at-risk accounts 60 days in advance by analyzing usage patterns across 3,000+ enterprise customers, enabling proactive retention campaigns that reduced churn by 8%
- Directed resource planning for BI team supporting M&A integration by reallocating analysts to critical-path projects and establishing priority frameworks, ensuring 100% on-time delivery of executive-facing dashboards during organizational transition
- Implemented data access controls (RLS, ACL) across 50+ sensitive datasets and managed team of 4 BI analysts, achieving zero security incidents while developing team expertise in data storytelling that enabled direct executive engagement
- Led data governance during FireEye to Mandiant transition by establishing data quality frameworks, validation rules, and documentation standards across Finance, Sales, and Product teams

Technical Lead, Reporting & Analytics | McAfee | Jun 2007 – Dec 2014

- Improved sales conversion by 15% by building executive dashboards tracking pipeline, bookings, and quota attainment for 200+ sales reps across APAC, EMEA, and Americas regions

- Automated sales reporting by developing ETL pipelines connecting Salesforce, SAP, and Oracle systems, reducing report generation time from 4 hours to 15 minutes and eliminating manual data entry errors
- Analyzed lost deals and partner performance across 50+ countries by creating regional performance dashboards, providing insights that shaped territory planning and partner incentive programs

KEY PROJECTS & PORTFOLIO

- **YouTube Analytics Dashboard with ML:** Built Streamlit dashboard with 3 ML models (Random Forest) predicting video virality, performance category, and view count with 85%+ accuracy. Includes publishing optimization heatmaps and strategic KPI tracking. (Python, Scikit-learn, Plotly, YouTube API)
- **E-Commerce Analytics Platform:** Developed Streamlit analytics dashboard with AI-powered insights (Claude API), supporting CSV/Excel uploads and PostgreSQL/MySQL connections. Features KPI tracking, trend analysis, and automated business recommendations. (Python, Pandas, Plotly)
- **Bike Sharing Demand Analysis:** Analysed 5.7M Divvy trip records to identify behavioural patterns between member and casual riders. Built Random Forest model forecasting ride demand with MAE of 110 seconds, informing fleet redistribution strategy. (Python, Scikit-learn, Geopy)
- **Sales Performance Dashboard:** Created interactive Tableau dashboard analyzing revenue trends, customer profitability, discount impact, and YoY growth across product categories and regions. (Tableau, SQL)
- **Portfolio:** <https://yousuffd.github.io/Portfolio/> | GitHub: github.com/yousuffd

TECHNICAL SKILLS

BI & Visualization: Power BI, Looker, Tableau, OBIEE, LookML, DAX, Excel

Data Platforms: BigQuery, SQL Server, MySQL, Salesforce, Google Cloud Platform

Programming: SQL, Python (Pandas, NumPy, Scikit-learn, Streamlit), DAX, LookML

Analytics: Revenue Analytics (ARR/MRR/NRR/Churn), Product Analytics (Funnel/Cohort/Adoption), Predictive Modeling, A/B Testing, Statistical Analysis

Data Engineering: ETL Pipelines, Data Warehousing, Data Modeling, Query Optimization, Data Governance

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Electrical & Electronics | Bangalore University | 1998-2002

Google Data Analytics Professional Certificate

IBM Data Science Professional Certificate
