

DILSHAD YOUSUFF

Business Intelligence Manager | Data Analytics & Revenue Analytics Leader

yousuffd@gmail.com | +91 9845976468 | linkedin.com/in/yousuffd-07b14714 | github.com/yousuffd

PROFESSIONAL SUMMARY

Results-driven BI Manager and Data Analytics leader with 20+ years delivering actionable insights across Product Analytics, Revenue Analytics, Finance, and Sales Operations. Expert in end-to-end BI solution design — data warehousing, ETL pipelines, dashboard automation, and self-service reporting — using Power BI, Looker, Tableau, BigQuery, and DAX. Deep SaaS expertise in ARR, MRR, NRR, bookings, churn, retention, and expansion revenue. Proven record building scalable BI ecosystems and executive reporting frameworks at Google Cloud, Mandiant, and McAfee.

CORE COMPETENCIES & ATS KEYWORDS

BI & Analytics Leadership: Business Intelligence (BI), Data-Driven Decision Making, Dashboard Development, Self-Service BI, KPI Framework Design, Executive Reporting

Revenue & SaaS Analytics: ARR, MRR, Bookings, Churn Analysis, Retention Analytics, Expansion Revenue, Revenue Walk, NRR, Customer Lifecycle Analytics

Product Analytics: Product Adoption, Funnel Analytics, Cohort Analysis, A/B Testing, User Behavior Analytics, Feature Adoption Metrics

Data Management: Data Warehousing, ETL (Extract, Transform, Load), Data Modeling, Data Pipeline Design, Datamart Architecture, Data Governance, Data Quality Management

Visualization & BI Tools: Power BI, Looker, Tableau, OBIEE, DAX Optimization, Excel (Advanced)

Cloud & Database Platforms: BigQuery (GCP), SQL Server, Salesforce, Siebel, Google Cloud Platform (GCP)

Programming & Analytics: SQL, Python, LookML, Statistical Modeling, Predictive Analytics, Data Mining, Forecasting

Leadership & Strategy: Cross-Functional Collaboration, Team Mentoring, Stakeholder Management, Agile BI Delivery, M&A Data Integration, Requirements Gathering, Data Storytelling

PROFESSIONAL EXPERIENCE

Manager, Finance Business Intelligence | Google Cloud (Nov 2022 – Dec 2025)

- Spearheaded end-to-end revenue analytics and financial data integration of Mandiant post-acquisition into Google Cloud systems, ensuring 100% data integrity, governance compliance, and uninterrupted business continuity.
- Designed and deployed automated Looker dashboards and self-service BI frameworks tracking product performance, customer behavior, product adoption, and enterprise KPIs — adopted by 1,000+ global users.
- Built a comprehensive Revenue Walk framework to analyze ARR progression, churn, expansion revenue, and product performance drivers — directly informing quarterly business reviews and strategic planning.
- Developed analytical frameworks for SaaS performance monitoring including customer lifecycle trends, retention cohort analysis, NRR tracking, and product adoption metrics across multi-product portfolios.
- Performed deep-dive analyses on bookings, ARR, churn, and customer retention to identify key revenue drivers and surface growth opportunities for executive leadership.
- Partnered with data engineering to optimize BigQuery workloads through query optimization, partitioning, clustering, and ETL restructuring — improving query performance by 40% and enabling scalable analytics at enterprise scale.
- Implemented data access controls (RLS, ACL policies) and lifecycle management policies ensuring compliance and data security across sensitive financial and operational datasets.
- Managed and mentored a team of BI analysts, building analytical capability in data storytelling, stakeholder communication, and self-serve reporting.

Manager, Strategy & Analytics | Mandiant (formerly FireEye) (Dec 2014 – Oct 2022)

- Led product and revenue analytics initiatives, developing forecasting models and executive reports incorporating customer segmentation, product usage trends, and SaaS performance KPIs to drive data-informed decisions.
- Built scalable ETL data pipelines and centralized datamarts, reducing dashboard refresh times by 60% and establishing a single source of truth across Finance, Sales, and Product functions.
- Developed Power BI dashboards delivering real-time insights on customer funnel, bookings, ARR, retention, and product adoption — enabling full visibility into customer lifecycle and revenue performance.
- Built and maintained complex Power Query transformations and DAX measures to consolidate data across finance, sales, and product sources, establishing unified data governance standards.

- Created global reporting frameworks enabling analysis of customer behavior, revenue performance, and market trends to guide go-to-market strategy and strategic planning.
- Led data governance and data quality management initiatives during organizational transition, ensuring continuity and accuracy of financial, sales, and product data.
- Recruited and mentored a high-performing team of analysts, establishing best practices in dashboard development, stakeholder engagement, and data storytelling.

Technical Lead, Reporting & Analytics | McAfee (Jun 2007 – Dec 2014)

- Delivered end-to-end BI analytics solutions supporting 200+ sales representatives worldwide; built executive dashboards on bookings, pipeline, and quota attainment — driving a 15% improvement in sales conversion.
- Reduced reporting latency from 4 hours to 15 minutes by automating dashboards and optimizing ETL data extraction pipelines, ensuring end-to-end data reliability.
- Conducted deep-dive analyses of lost deals, regional trends, and partner performance, equipping leadership with insights that informed GTM strategies and incentive planning.
- Partnered with Finance, Marketing, and IT to establish unified reporting standards supporting global sales and operations alignment.

Business Analyst | IBM (Mar 2007)

- Consolidated global hiring metrics, building unified recruitment dashboards that reduced reporting discrepancies and improved talent pipeline visibility by 18%.

Senior Quality Assurance Analyst | America Online (AOL) (Nov 2002 – Dec 2006)

- Designed performance dashboards for QA tracking, enabling data-driven team management and continuous process improvement.
- Spearheaded quality monitoring programs that enhanced service accuracy by 20% and improved customer satisfaction scores.

KEY PROJECTS & ACHIEVEMENTS

- **Revenue Walk Framework (Google Cloud):** *Built end-to-end revenue analytics model tracking ARR progression, churn, expansion revenue, and customer behavior — used by Finance leadership for strategic planning and QBRs.*
- **Cloud Analytics Migration:** *Championed migration from legacy systems to BigQuery + Looker, enabling scalable self-service BI analytics for 1,000+ global users.*
- **ETL & MDM Process Automation:** *Automated Master Data Management (MDM) workflows using ETL pipelines, cutting sales plan rollout from several days to 30 minutes.*
- **Executive Dashboard Transformation:** *Unified Finance, Sales, and Marketing data into a single CXO dashboard used for daily data-driven decision making.*
- **M&A Data Integration:** *Led Mandiant post-acquisition data integration into Google Cloud, ensuring 100% data integrity and governance compliance.*
- **Regional Performance Analytics:** *Designed KPI frameworks monitoring revenue growth, pipeline performance, and operational metrics across global markets.*

TECHNICAL SKILLS

BI & Visualization Tools: Power BI, Looker, Tableau, OBIEE, Excel (Advanced), LookML

Cloud & Data Platforms: BigQuery, Google Cloud Platform (GCP), SQL Server, Salesforce, Siebel

Programming & Analytics: SQL, Python, DAX, LookML, Statistical Modeling, Predictive Analytics, Data Mining, Forecasting

Data Engineering: ETL Pipeline Design, Datamart Architecture, Query Optimization, Data Warehousing, Data Modeling, Data Integration

Analytics Techniques: SaaS Metrics (ARR/MRR/Churn/Retention), Cohort Analysis, Revenue Analytics, Product Analytics, A/B Testing, Funnel Analytics

Dev Environments: Jupyter Notebooks, PyCharm, VS Code

Governance & Compliance: Data Security, RLS, ACL Policies, Lifecycle Management, Data Quality Management, Regulatory Compliance

Methodologies: Agile BI Delivery, M&A Data Integration, ETL Automation, Cross-Functional Collaboration, Requirements Gathering

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Electrical & Electronics — Bangalore University (1998–2002)

IBM Data Science Professional Certificate

Google Data Analytics Professional Certificate

PROFESSIONAL AFFILIATIONS

- Member, Data Quality & Compliance Task Force — Mandiant Integration Program
- Member, Analytics Leadership Forum — Cross-Functional Data Community (Finance, Sales, Operations)
- Contributor, Enterprise Reporting Automation Working Group — Finance Transformation Initiative
- Contributor, Data Compliance & Regulatory Response Team — Supported data submissions for U.S. Department of Justice during M&A review
