

DILSHAD YOUSUFF

Senior Analytics & Business Intelligence Leader | SaaS Revenue & Product Analytics | AI-Powered Analytics Automation

yousuffd@gmail.com | +91 9845976468 | [linkedin.com/in/yousuffd-07b14714](https://www.linkedin.com/in/yousuffd-07b14714) | dilshadyousuff.com

PROFESSIONAL SUMMARY

Analytics and Business Intelligence leader with 15+ years of experience turning operational and business data into measurement frameworks, product and SaaS revenue analytics, and strategic recommendations for senior leadership. Built enterprise analytics organizations, SaaS revenue models spanning ARR, MRR, NRR, GRR, CAC, and LTV, KPI frameworks, forecasting models, and self-service analytics platforms across Google Cloud, Mandiant, and McAfee, while using AI-assisted analytics to reduce manual reporting effort and scale analytical impact. Extensive experience partnering with Finance, Product, Sales, Engineering, and Operations to decide what to measure, why it matters, and what action to take, and leading and developing analytics teams to deliver on that strategy.

CORE COMPETENCIES

- Business Intelligence & Analytics Strategy | Data Architecture & Data Warehousing
- Product & Funnel Analytics | SaaS Revenue Economics (ARR/MRR/NRR/GRR/CAC/LTV)
- Self-Service BI Ecosystems | M&A Data Integration
- Cross-Functional BI Delivery | AI-Powered Reporting Automation
- Team Leadership & Mentoring | Executive Stakeholder Partnership
- Data Governance & Compliance | Requirements Gathering & Data Storytelling

PROFESSIONAL EXPERIENCE

Manager, Finance Business Intelligence | Google Cloud

Nov 2022 to Dec 2025

- Defined the enterprise analytics strategy for Finance by building a governed self-service BI platform that enabled more than 1,000 global users to independently analyze business performance and accelerate decision-making.
- Architected a self-service BI platform on Looker and BigQuery adopted by over 1,000 global Finance users, including LookML models, governed explores, and dashboards covering product performance, customer behaviour, and enterprise KPI reporting.
- Built the Revenue Walk framework tracking ARR, GRR, NRR, churn, and expansion revenue that became the standard model for quarterly business reviews and board-level strategic planning.
- Led a team of three BI analysts, establishing best practices in data storytelling, requirements gathering, and stakeholder communication across Google Cloud Finance.
- Developed SaaS analytics frameworks covering MRR and NRR tracking, customer lifecycle analysis, retention cohort modelling, and product adoption metrics across multi-product portfolios.
- Improved BigQuery query performance by 40 percent through query tuning, partitioning, and ETL restructuring, and adopted Gemini 2.5 Pro and AI-assisted tooling to accelerate insight generation while reducing manual reporting effort.
- Implemented row-level security (RLS) and ACL-based access control policies to ensure compliance and data protection across sensitive financial and operational datasets, operating within Google's Piper version-control and Buganizer issue-tracking ecosystem to maintain production-grade release standards.
- Established documentation standards for datasets, KPIs, and semantic models to ensure consistent metric definitions across Finance and Product stakeholders.

Manager, Strategy & Analytics | Mandiant (Now Google Cloud)

Dec 2014 to Oct 2022

- Led enterprise revenue and product analytics across 2,000+ enterprise customers on a \$200M+ ARR business, developing forecasting models, SaaS KPI frameworks spanning ARR, ACV, Bookings, Retention, CAC, and LTV, customer segmentation, and executive business reviews that informed strategic investment and growth decisions.
- Drove an 8 percent reduction in enterprise churn through targeted retention analytics, cohort modelling, RFM-based customer segmentation, and early-warning dashboards that enabled account teams to intervene proactively ahead of renewal risk.
- Hired, structured, and mentored an analytics team of five, establishing roadmap-driven requirements gathering practices, self-service reporting standards, and structured stakeholder engagement across Finance, Sales, and Product.
- Designed scalable ETL/ELT pipelines that consolidated eight data sources into centralized data marts, cutting dashboard refresh times by 60 percent and creating a single source of truth across Finance, Sales, Marketing, Channel, and Product.
- Owned and governed the Power BI Service infrastructure, building executive dashboards and scorecards with complex DAX and Power Query measures to deliver real-time insights on bookings, ARR, retention, and product adoption, while implementing dynamic row-level security and managing user access.

- Led the migration of on-premises SQL Server data infrastructure to Azure SQL Database using Azure Data Factory, and directed the full-scale migration of Tableau dashboards to Power BI following the organization's strategic retirement of Tableau, ensuring zero data loss and seamless adoption across Sales and Finance.
- Developed executive narratives and business intelligence used by Finance, Product, and Sales leadership to evaluate performance, identify opportunities, and prioritize strategic initiatives.
- Led data governance and quality management through the organizational transition period, maintaining the integrity of financial, sales, and product data.

Technical Lead, Reporting & Analytics | McAfee

Jun 2007 to Dec 2014

- Built and maintained executive reporting and analytics covering bookings, pipeline, forecast accuracy, sales funnel analytics, and quota attainment for over 200 global sales representatives.
- Designed and maintained QlikView dashboards and reports using Set Analysis and advanced scripting across Sales, Operations, and Finance business units, optimizing data models and binary, incremental, and partial load scripts for high-performance reporting at scale.
- Modernized reporting through automation, reducing report delivery time from four hours to fifteen minutes while significantly improving decision speed for Sales leadership.
- Conducted ongoing sales, partner, and channel marketing performance analysis to surface growth opportunities and support go-to-market effectiveness.
- Partnered with Sales, Marketing, Finance, and IT to standardize data integration across systems and establish a unified reporting framework across global operations.

Business Analyst, IBM (Mar 2007) | Sr. QA Analyst, AOL | IBM / America Online

Nov 2002 to Dec 2006

- Improved talent hiring visibility through analytics reporting at IBM. Built QA performance dashboards at AOL that contributed to improved service accuracy.

BUSINESS IMPACTS

Self-Service BI Platform at Scale (Google Cloud/Mandiant)

- Architected and deployed a governed self-service analytics platform on Looker and BigQuery that scaled to over 1,000 Finance users globally, eliminating analyst bottlenecks and enabling Finance, Sales, and Product teams to access trusted data independently.

Revenue Walk Framework (Google Cloud/Mandiant)

- Designed and built an end-to-end SaaS revenue analytics model tracking ARR, GRR, NRR, churn, expansion, CAC, and LTV drivers across a \$200M+ ARR portfolio. Adopted by Finance leadership as the standard framework for quarterly business reviews and board-level strategic planning.

M&A Data Integration with DOJ Compliance (Google Cloud/Mandiant)

- Led the post-acquisition integration of Mandiant's data infrastructure into Google Cloud with 100 percent data integrity, including data submissions for U.S. Department of Justice regulatory review and zero disruption to business reporting.

Enterprise Churn Reduction (Mandiant)

- Drove an 8 percent reduction in enterprise churn across a \$200M+ ARR portfolio by building cohort-based retention analytics and early-warning dashboards that allowed account teams to act on renewal risk before it materialized.

Reporting Infrastructure Modernization (Mandiant and McAfee)

- At Mandiant, consolidated eight data sources into centralized data marts, migrated on-premises SQL Server to Azure, and cut dashboard refresh latency by 60 percent. At McAfee, reduced sales report turnaround from four hours to 15 minutes through QlikView optimization, dashboard automation, and ETL pipeline improvements.

TECHNICAL SKILLS

BI & Visualization: Power BI, Looker / LookML, Tableau, QlikView, OBIEE, DAX, Excel (Advanced)

Cloud & Data Platforms: BigQuery, Google Cloud Platform (GCP), Azure SQL Database, Azure Data Factory, SQL Server, Salesforce, Siebel

Languages: SQL, Python, VBA, HTML/CSS

Data Engineering: ETL/ELT Pipeline Design, Data Mart & Datamart Architecture, Query Optimization, Data Warehousing, Dimensional & Data Modelling

Analytics Methods: Statistical Modelling, Predictive Analytics, Forecasting, Cohort Analysis, Funnel Analysis, RFM & Customer Segmentation, CLV/LTV Modelling, A/B Testing

Governance & Security: Data Governance, Row-Level Security (RLS), ACL Policies, Data Quality Management, Regulatory Compliance

Domain Expertise: P&L Reporting, SaaS KPIs (ARR, MRR, NRR, GRR, CAC, LTV, Bookings, Retention, Churn), Sales Funnel Analytics, Channel & Marketing Analytics

AI & Analytics Tools: AI-assisted Analytics, Generative AI, Gemini 2.5 Pro, Claude, ChatGPT, Analytics Automation

Dev Environments: Jupyter Notebooks, PyCharm, VS Code

Workflow & Engineering Tools: Google Piper, Buganizer (Bug Tracking), Git, GitHub

EDUCATION & CERTIFICATIONS

Bachelor of Engineering, Electrical & Electronics, Bangalore University (1998 to 2002)

IBM Data Science Professional Certificate | Google Data Analytics Professional Certificate
